

Read & Write Gold 8: Word Wizard

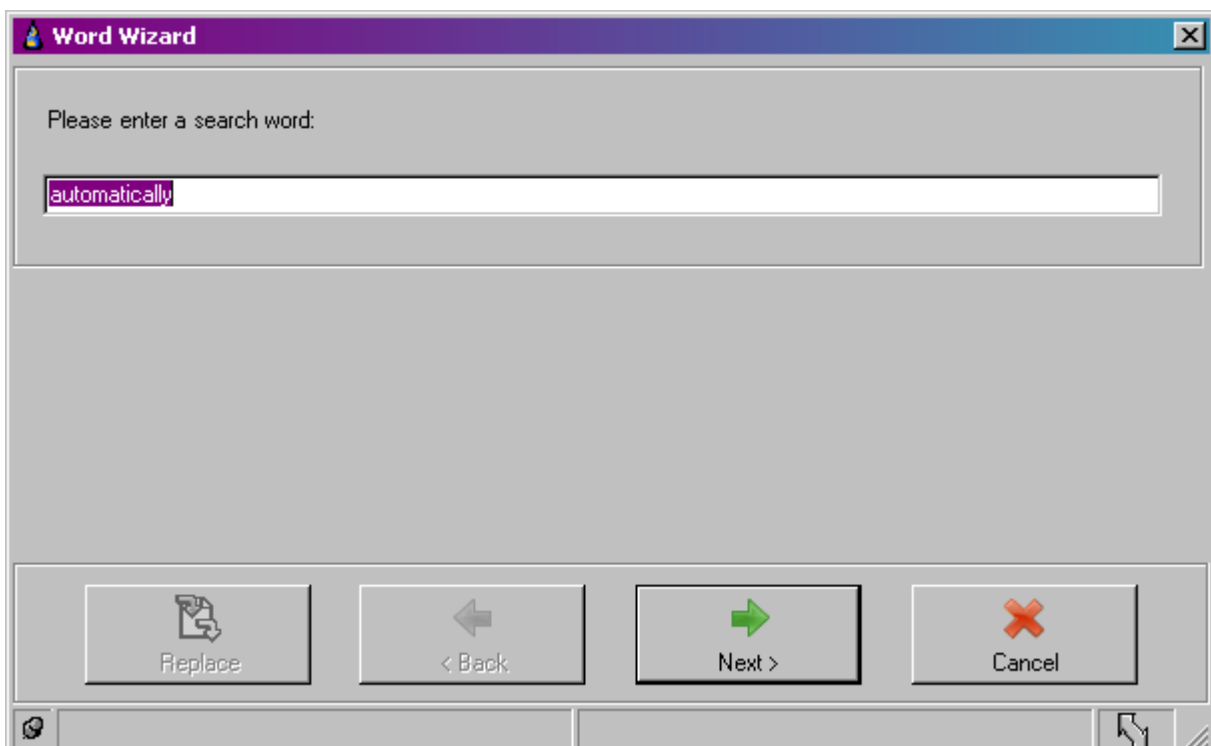

The Read & Write Gold 8 Word Wizard provides a quick “spot-check” of a word’s meaning. Just click the wizard’s hat icon to open up the **Word Wizard**.

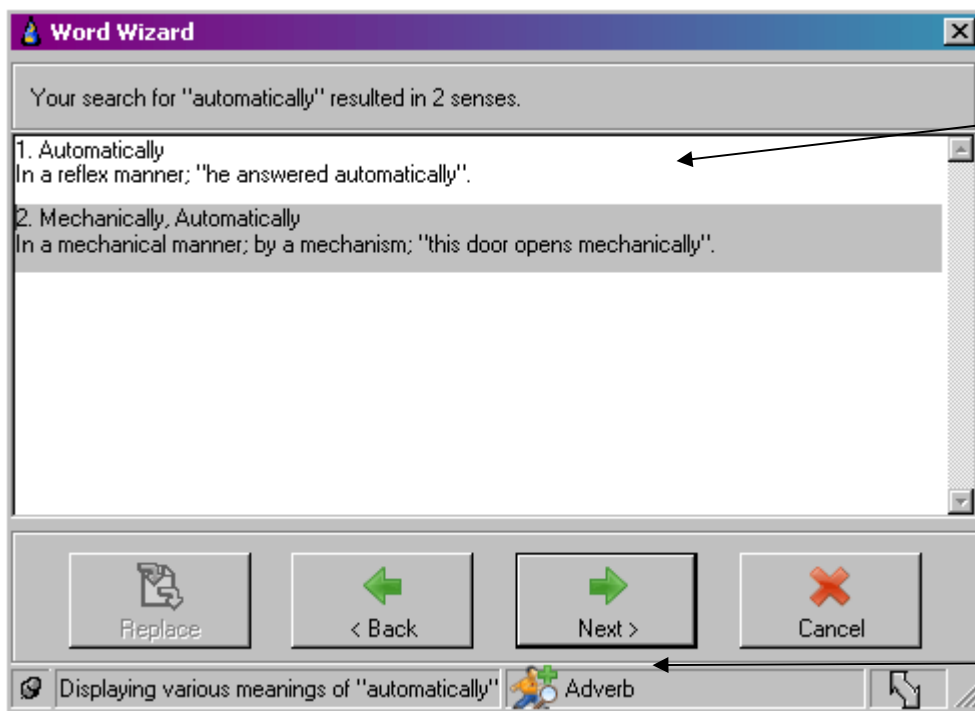

Just type in, or cut & paste the word you want to look up.

If you have a document open and it contains a word you want to look up, simply select it before clicking on the wizard’s hat icon, and it will appear in the **Please enter a search word:** box automatically.

Click the **Next** key to see the definitions of the selected word.

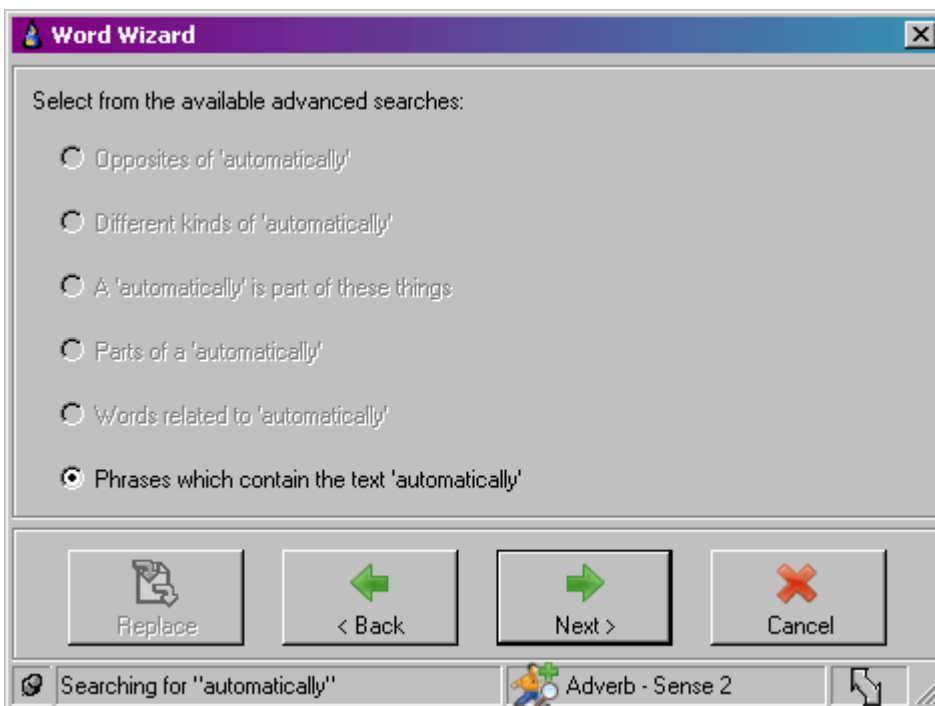

All available definitions of the word are displayed.

Read & Write Gold 8 also tells you what type of word it is.

In this case, the word "automatically" is an **adverb**.

Click on a definition, as above. The **Next** key becomes available. Click it to see more information using the selected definition of your word.

In this example, the only one left is for phrases.

However, if more than one is available, click on the one you want to see, and then on **Next**. Click **Back** to see a different one.

When you've finished, either click on **Cancel** to leave **Word Wizard**.
