Orphan Autoimmune Disorders to 2017:

Executive Summary

The Global Orphan Autoimmune Disorder Therapeutics Market Will Grow Steadily with Very Few Promising Molecules in the Pipeline

Orphan Autoimmune Disorders to 2017: Executive Summary

GBI Research analysis suggests that the global orphan autoimmune disorders therapeutics market is one of the niche markets in the pharmaceutical industry. The indications covered in the study such as idiopathic thrombocytopenic purpura (ITP), myeloid dysplasia (MDS), and myelodysplastic syndrome (MDS) have very low prevalence and incidence rates. The market has witnessed a tremendous growth between 2008 and 2010 due to the launch of two experimental therapies for ITP. The market revenue is expected to grow at a promising pipeline molecules. Moreover the market faces stiff competition from generics and off-label therapeutics which hinders the growth of branded drugs.
