Aims of the programme

The principal aims of the programme are:

The qualification is designed to enable teachers of learners with additional needs to:

1. adopt an integrated approach to the theory and practice of teaching of learners with additional needs
2. reflect on their own previous/current levels of experience, practice and skills, and areas for development
3. identify principles of learning, teaching, assessment and evaluation for learners with additional needs
4. develop communication and interpersonal skills
5. develop an awareness of your professional role and responsibilities as a teacher for learners with additional needs
6. engage critically with key ideas in teaching and teacher education develop and feel confident in their own personal language skills
7. develop and feel confident in their own specialist skills in teaching learners with additional needs

Distinctive features of the programme

The programme will develop knowledge and understanding of teaching learners with additional needs, students will study and explore a range of specific learning and disability impairments and identify their impact on learning and teaching. They will investigate practice in an area of disability and apply this to their teaching. The programme will enable students to plan and deliver inclusive learning and teaching sessions and to evaluate and reflect on their own teaching.

What an undergraduate should know and be able to do on completion of the programme:

The qualification is based on the national professional standards for teachers in the Lifelong Learning Sector. Work Based Experience is integral to the course and the modules. The integration of theory and practice is an important theme in the module assignments. Practical teaching is assessed by means of teaching observations which are related to module assessments

Students who are assessed as successful in each of the modules are inferred to have achieved the Scheme's aims and objectives, since the former is a detailed clarification of the requirements of the latter. Provided there has been no infringement of the University's or Scheme's regulations, such a student would normally be recommended to the Teacher Training Assessment Board for a pass in the award for which they were registered.

By the end of their programme of study, students will have:

Learning and teaching strategies

A variety of teaching and learning methods are employed throughout the programme in order to ensure the acquisition and development of the appropriate knowledge, understanding, skills and competences in order to achieve the learning outcomes. Some of these will be experienced during formally timetabled classes with your tutor and some will be experienced through workshops, small group and individual practical activities together with structured exercises and discussions. Individual support will be given in tutorials. Blended learning will be utilised as appropriate, for example utilising the VLE to provide an e-forum for teachers to discuss their work and obtain peer support. You will be required to take part in e-discussions with peers and tutors and to make full use of ICT as a source of information and support and to maintain a portfolio of evidence.

It is expected that you will demonstrate significant independence in your study, taking responsibility for the management of your own learning time.

Assessment regulations

- Assessment Regulations for Undergraduate Modular Programmes

Grade bands and classifications

(for information only at this stage – the Assessment regulations are being revised for September 12)

In order for students to achieve a 'Pass', all the specific assessment criteria must be addressed and achieved. In addition, the general criteria must be addressed. The following grade descriptors provide the opportunity to recognise the extent to which the student has achieved the general criteria for assessment.

Following formal assessment of an assignment, there are, therefore, four possible outcomes – distinction, merit, pass and refer, (in line with the Ofsted grading of 1, 2, 3, 4). 'Refer' indicates that the work submitted is inadequate. Detailed feedback will be provided to enable a second attempt to be made. The maximum grade possible following a second attempt will be a 'pass'. An assignment which does not meet all the criteria following a second attempt will routinely be second marked to ensure the accuracy of the grade.
