**Learning and teaching strategies**

A variety of teaching and learning methods are employed throughout the programme in order to ensure the acquisition and development of appropriate skills, knowledge and

concepts to achieve the stated learning outcomes. Active learning is promoted by seminars, self-directed study, lectures, video viewing and analysis, tutorials, IT sessions, library and guided study. Visits to community settings, simulation of funding applications, proposals for project development and mock interviews, VLE through the use of Moodle and other appropriate technology are utilised throughout the programme. Guest speakers with significant current experience of youth & community work regularly disseminate knowledge to students. National youth & community organisations also deliver seminars enabling students to be up-to-date with current policy and legislation.

The **Personal Tutoring** scheme has been embedded within the youth work curriculum throughout each of the years of study. Students are provided with 6 weeks in trimester 1 and 4 weeks in semester 2 in year 1 of their studies. Year 2 and 3 are provided with 4 weeks in semester 1 and 4 weeks in semester 2. Personal Tutoring is delivered as part of the core curriculum and supports our learning and teaching strategies.

**PDP** is an essential element of the learning and teaching strategy as students are expected to identify skills and qualities they already possess before embarking upon any placement. They are also required to identify areas which need to be developed and improved upon whilst on the placement. This then is used for the next placements identification of personal and professional areas of development. Placement supervisors play a vital and substantial role within the PDP process.
