An application form, job description and
person specification can be viewed on our
website: [https://www.bolton.ac.uk/staff-
area/professional-services/about-
hr/vacancies](https://www.bolton.ac.uk/staff-area/professional-services/about-hr/vacancies) or requested by email:
jobs@bolton.ac.uk.

Applicants need to be aware that only a
completed application form will be
considered, unless it is specifically
indicated in an advertisement that a CV
will be accepted. Where appropriate, you
should include a list of all publications
when submitting your application. Please
ensure you quote the position reference
number on all applications submitted.

If an applicant is interested in more than
one vacancy, a separate application must
be submitted for each vacancy to ensure
that the individual role requirements are
addressed.

Candidates must be eligible to work in the
UK, for more information please visit
<https://www.gov.uk/check-uk-visa>. No
agencies.

The University of Bolton is a “Teaching Intensive, Research Informed” higher education institution whose distinctive high quality, student-focussed, undergraduate and postgraduate programmes attract students from all over the world.

Our staff are at the heart of everything we do: they are highly qualified and experienced in their fields, supporting their teaching practice by carrying out quality research and engaging in continuous professional development. Staff pride themselves on being outstanding professionals that provide excellent learning, teaching and applied research and support in the provision of custom-designed, industry led courses in numerous subject areas.

We have an exciting opportunity within our Civil Engineering & Construction Group at the University of Bolton, for a Senior Lecturer in Civil Engineering. As a Senior Lecturer you will play a pivotal role in the success of our students through:

- Leading and teaching on taught undergraduate and postgraduate programmes across the civil engineering portfolio and contributing to the management of these programmes wherever possible.
- Leading, planning and preparing teaching and learning programmes
- Developing practical interactions between students, employers and professional bodies that will lead to students having a full understanding of civil engineering, supported by your own industrial experience and case study exemplars.
- Liaising with all stakeholders on apprenticeship programmes.

Ideal candidates will have experience of working in the Civil Engineering profession. Degree and postgraduate qualifications are relevant but industrial experience is highly desirable along with an interest to further study at the university alongside your role to achieve a postgraduate qualification. Other core skills are:

- A proven ability to innovate and develop solutions.
- Excellent written and verbal communication skills.
- Passion and motivation to drive the civil engineering area forward as well as within your own specialist area of interest; digital, geotechnical and/or surveying skills are particularly desirable, although applicants with other specialisms will be looked at on merit.
- Proven ability to prepare high quality outputs.
- Able to successfully engage and drive with the student recruitment process for programmes at all levels, and by pastoral support interventions to retain and enhance student performance and employability would be a strong advantage.

Further details of the essential criteria for the post can be located within the Job description (please click 'Apply now for this job' for supporting documents).
