

Facilities & Built Asset Management degree apprenticeship

Apprenticeships
Learn. Develop. Earn.

ENGINEERING
@ Bolton

'Upskilling' is the new 'hiring'

Upskilling is the new hiring

Degree apprenticeships are applied learning at its best – supporting your business in becoming future fit and up to date with current market trends.this way.

“Undertaking the apprenticeship degree has enabled me to develop both personally and professionally. Engaging and sharing experience with colleagues on the course has enabled me to take a different view on similar scenarios within my own role, enabling me to be more dynamic in how I approach problems. The work life balance is tough, and that shouldn't be underestimated, but the rewards are well worth it. One of the most valuable aspects is mixing with people from all sectors and industries. The challenges we see have breadth and depth, and how we approach them is so varied!”

Joe Lewis | Bidfood

Greater Manchester Business School | University of Bolton
Facilities & Built Asset Management Degree Apprenticeship

This course is delivered as an executive management programme – on block-week delivery, where you will acquire new knowledge each month that you take back into your workplace to apply as new skills. The advantages of block delivery are many. There is the opportunity for you to network with colleagues and guest lecturers at a depth greater than a day of university can delivery, and over each block week, deep learning and questioning will develop more easily than it would over five individual weeks, a day at a time.

On programme, we focus on performance by creating effective connections between working and learning, learning by working together supported by formal teaching. Robust support from your mentor ensures you are well placed to analyse organisational and your own performance needs and you will learn to quickly design, develop and deliver organisational performance across multiple areas. There is a focus on content and organisational context, and on practical knowledge taught on programme. As you are undertaking a senior management degree apprenticeship your focus will be on the entire organisation, forcing you to look outside of Facilities Management and identify the interdependencies and connections ubiquitous across any complex organisation.

As learning is a constant process and part of progression and development, it is essential that learning and working are integrated in this way.

iwfm Institute of Workplace
and Facilities Management

Accredited and endorsed by IWFM, this degree apprenticeship provides the academic qualification to achieve Certified status.

Attracting and developing **your talent**

What are the benefits of Apprenticeships?

There are more benefits than we could list! However, these are the most compelling:

- + **Skill development:** Employees can learn new skills that align with evolving industry trends and technological advancements, ensuring they stay relevant and competitive
- + **Increased productivity:** Apprenticeships focus on practical, hands-on learning. Staff can apply new skills immediately, leading to increased productivity and efficiency
- + **Career development:** Providing Apprenticeship opportunities demonstrates a commitment to employees' professional growth, enhancing job satisfaction and morale
- + **Retention:** Investing in existing staff through Apprenticeships can increase employee loyalty and reduce turnover, as employees appreciate the opportunities for advancement
- + **Cost-effective talent development:** Building a talent pipeline from within the organisation reduces the need for external hiring and associated recruitment costs
- + **Professional qualification:** Employees can gain professional accreditation alongside their Apprenticeship programme

Can my current staff do an Apprenticeship?

Yes, existing staff with job roles that match the target Apprenticeship standard can undertake an apprenticeship programme. You simply need to sign up for the Apprenticeship programme with us and we will check the eligibility requirements. If you would like more information on this, please contact our team at apprentices@bolton.ac.uk or call **01204 903 940**.

Funding

A company with a wage bill of over £3 million per annum will have a levy fund, which it can utilise to fund Apprenticeship training. A company that has a wage bill less than this, can still access Government funding to support the Apprenticeship course costs. The government covers 95% of the cost, whilst the company, with what is termed "co-investment", contributes the remaining 5%.

How does it all work?

Whether you are a large or small employer, we can support you through the Apprenticeship process. We will provide support and guidance on the initial setup; working together to establish the contract, checking eligibility requirements for Apprentices, talking through the expectations you have about what an Apprenticeship will deliver and how we can work alongside your business.

We have already achieved a high success rate and were recently awarded Ofsted Good.
